

# X1-LiNX Communication Options

The SABIA X1-LiNX tells your operations exactly ***What You Need To Know*** by delivering analysis data to your control system via the best communication method for your site.

Integrated, on-belt electronics are network enabled, allowing the flexibility to locate the analyzer server almost anywhere onsite WITHOUT the need for extensive cabling, or dedicated rooms/cabinets in close proximity to the analyzer.

Flexible communication options are just one of the many ways SABIA provides ***Better Performance, Better Value, and a Better Customer Experience***
